SKILLS

- PYTHON
- JAVA
- C++

- HTML
- CSS
- JAVASCRIPT

- SQL
- NODE JS
- MONGODB

PROJECTS

MERN FULL-STACK
- Technologies used: MongoDB, Express.js, React, CSS and Node.js.
- It is a scheduler app that helps customers schedule their appointment.
- Customers can create their account and login using the account.
- It is authenticated.

TODO-LIST APP
- Technologies used: Node.js, MongoDB, CSS and Express.js.
- Users can add/delete to-do lists.
- I used database to store users' data.

ETHIOPIA TRAVEL AGENCY WEBSITE
- Technologies used: HTML, CSS and JAVASCRIPT.
- The app is for everyone that wants to visit Ethiopia.
- It contains Images, history of Ethiopia, and some destination areas.

LEARNING-FACTS WEB APP
- Technologies used: React, HTML, CSS and JAVASCRIPT
- It is an app where users can learn new facts that they did not know about.
- Users will be able to add sources for each fact they add.
- There are several categories which means users will have a chance to choose the categories they want to add the fact to.
- Users can vote the facts whether they like it or dislike it so, others can see it.

TIC-TAC-TOE
- Technologies used: Python
- It is python game where two players can play a tic-tac-toe game.
- players can win, lose, sand tie the game.
- This game is built using function, if-else statement, and loops.

NUMBER-GUESS
- Technologies used: Python
- It is a game where we play with the computer.
- The computer generates a random number and the user guess.
- When the user enters a number, the program will tell the user if the number they entered is higher or lower than the computer number
- This game is built using function, if-else statement, and loops.

BLACK-JACK
- Technologies used: Python
- It is a python game between a user and dealer(computer)
- If the sum of the card that either the user's or dealer's equals to 21, loses
- This game is built using function, lists, if-else statement, and loops
